Title: DoD USAMRMC FY18-FY22 Broad Agency Announcement for Extramural Medical Research

Funding Number: W81XWH18SBAA1

Closing Date: 9/30/22

# of awards/funds available: The funding amount for this BAA is unspecified, and the number of awards is indeterminate and contingent upon funding availability. For an assistance agreement, the total period of performance may be proposed for up to 4 years in length. For research support contract awards, the total period of performance may be proposed for up to 5 years in length. For conference or symposium support contract awards, the total period of performance may be proposed for up to 2 years in length.

Description: The USAMRMC mission is to provide solutions to medical problems of importance to the American Service member at home and abroad, as well as to the general public at large. The scope of this effort and the priorities attached to specific projects are influenced by changes in military and civilian medical science and technology, operational requirements, military threat assessments, and national defense strategies. Extramural research and development programs play a vital role in the fulfillment of the objectives established by the USAMRMC. Projects funded under this BAA must be for basic and applied research to support scientific study and experimentation directed toward advancing the state of the art or increasing knowledge or understanding rather than focusing on development of a specific system or hardware solution. Research and development funded through this BAA are intended and expected to benefit and inform both military and civilian medical practice and knowledge.
