5TH ANNUAL INTRODUCTION TO CLINICAL & TRANSLATIONAL RESEARCH STUDY DESIGN

A course presented by the Southern California Clinical and Translational Science Institute, the Departments of Otolaryngology - Head & Neck Surgery and Preventive Medicine and Children’s Hospital Los Angeles

COURSE GOALS

- To provide a foundation in key components of clinical research design
- To facilitate the development of students’ research protocols in preparation for foundation grant applications
- To improve the reporting quality of clinical and translational research studies

COURSE INFORMATION

- This course is designed for residents, fellows, and junior faculty as a practical introduction to clinical and translational research methods
- Applicants must identify a research topic and faculty advisor
- Tuition: $400
- Enrollment is limited to the first 80 accepted applicants.

COURSE FORMAT

- Course will be held at HSC and CHLA campuses. Locations to be announced.
- Students can attend either location throughout the course
- Pre-recorded lectures are required to view prior to class. Lecture discussions start at 9am, and small group breakout sessions are at 10:30am

By the end you will have a complete research protocol!

Students and alumni will be eligible for a $1500 pilot research award.
